1	1) The role of growth factor families in cancer prostate	-	0
2	2) Hepatitis C infection, tumor necrosis factor receptors (R55 and R 75) and cryoglobulinaemia in cases of Non Hodgkin,s Lymphoma.	-	0
3	3) Causal relationship between thrombopoietin level and thrombocytopenia associated with chronic viral hepatitis in children.	-	0
4	4) Role of some trace elements in thyroid function in ambulatory elderly	-	0
5	5) Apoptosis and cytoproliferative marker changes in chronic hepatitis C and hepatocellular carcinoma .	-	0
6	6) Study of fasting serum insulin, insulin auto antibodies, islet cell antibodies and glucose tolerance in patients with chronic hepatitis C virus infection.	-	0
7	7) New Electrochemilumenscence immunoassay for the determination of CYFRA 21-1 and its clinical diagnostic performance in urine samples of Egyptian patients with bladder cancer .	-	0
8	8) Detection of active tuberculosis infection by T- cell response to ESAT- 6 and culture filtrate protein - 10 and increased gamma interferon producing cells .	-	0
9	9) Evaluation of prognostic factors of anti - neutrophil cytoplasmic antibody (ANCA) associated - glomerulonephritis	-	0
